SANDEEP SADHASIVAM

TECHNICAL QUALITY ASSURANCE AT KEYWORDS STUDIOS

8105582110 · sandeep.sadhasivam@gmail.com · https://linkedin.com/in/sndpsdhsvm · Karnataka

Versatile **QA Professional** and **Developer** with a strong foundation in **Functionality QA** (FQA), App Development, and DevOps principles. Experienced in testing cross-platform games (Xbox, PS, Nintendo Switch) and developing mobile applications with Flutter. Recently certified in **DevOps** automation with hands-on experience in virtualization (Proxmox), containerization (Docker/Kubernetes), and CI/CD pipeline implementation.

EXPERIENCE

Technical Quality Assurance (Level 1)

10/2026 – Present

Keywords Studios — Bangalore, India

- Executed Platform Compliance Testing (XR): Conducted rigorous technical compliance test passes adhering to Xbox Requirement (XR) standards, GPPC (Game Pass PC), and Steam requirements to ensure zero compliance blockers prior to platform submission.
- Managed Age Rating Media Capture: Authored and recorded target gameplay footage highlighting violence, gore, and interactive elements required by global age rating boards (ESRB, PEGI, CERO, USK) for official certification.
- Led Pre-Release Sanity Testing: Performed high-priority final sanity and smoke test passes on release-candidate builds to validate build stability, core functionality, and critical path progression before public release.
- Executed Retail & Storefront Audits: Verified live retail builds and storefront pages across multiple platforms (Xbox Store, Steam, PC Game Pass) to confirm correct entitlement allocation, DLC integration, localized assets, and pricing display.
- Extracted & Analyzed System Logs: Used platform-specific developer dashboards (Xbox Manager/Partner Center, Steamworks) to pull crash dumps, system logs, and telemetry data for dev team debugging.
- Maintained Defect Lifecycle in Jira: Documented compliance failures and technical defects with precise platform spec references, detailed reproduction steps, and visual proofs to expedite resolution.

Functionality Quality Assurance (Level 2)

12/2023 – 10/2026

Keywords Studios — Bangalore, India

- Executed comprehensive functional, regression, and ad-hoc test passes across PC and console builds, ensuring high stability and gameplay fidelity.
- Identified and logged complex defects in Jira with clear steps to reproduce, logs, and visual evidence to accelerate developer resolution.
- Collaborated with QA leads and development teams to track blocker-level issues and meet critical milestone deadlines.
- Assisted in training junior team members on defect reporting guidelines, test suite execution, and internal QA workflows.

EXPERIENCE

Junior Application Developer
06/2022 – 01/2023

Proactive For Her — Bengaluru, India

- Developed a women's healthcare mobile application using Flutter, adhering to clean, modular, and reusable code practices.
- Implemented state management and modern UI standards to improve user engagement and app performance.
- Engineered offline caching solutions using ObjectBox and optimized image precaching for seamless user experiences.
- Integrated REST APIs and managed successful deployments to both the Apple App Store and Google Play Store.

Webflow Developer for landing Pages
03/2022 – 06/2022

Proactive For Her — Bengaluru, India

- Built high-conversion landing pages using Webflow and integrated Google Sheets for automated lead management.Set up data tracking and analytics using Google Tag Manager, Meta Pixel, and Hotjar to monitor conversion rates.
- Developed high-converting Webflow landing pages focused on responsive layout design, clean visual hierarchy, and performance optimization.
- Automated lead pipelines by connecting Webflow forms directly to Google Sheets for real-time lead tracking and instant management.
- Configured tracking infrastructure using Google Tag Manager, Meta Pixel, and Hotjar to monitor conversion funnels and user engagement metrics.
- Utilized heatmap and session recording data from Hotjar to identify drop-off points and implement CRO improvements.

Brand Representative
04/2019 – 12/2019

Leroc — Bengaluru, India

- Exceeded monthly sales targets (+5 units/month) for Lenovo Legion Y540 high-performance laptops across Reliance Digital and Croma outlets.
- Engineered interactive customer experiences by conducting live hardware and gaming performance demos in high-footfall retail environments.
- Built strong channel relationships with store managers and sales staff at Reliance Digital and Croma to secure prime floor placement for Lenovo display units.
- Analyzed retail trends and customer feedback to optimize sales pitches and report consumer preferences directly to brand leadership.

EDUCATION

MSc Computer Science
01/2020 – 12/2022

Kristu Jayanti University — Bangalore, India

Bachelor's of Computer Application
01/2017 – 12/2021

Kristu Jayanti University — Bangalore, India

SKILLS

Jira · Confluence · Microsoft Excel · Google Sheets · Test Plan Execution · Regression Management · Bug Reporting · Test Rail · Platform Tools · Flutter / Dart · Python · Postman · Git · Jenkins · Terraform · Ansible · AWS · Prometheus · Grafana · Prometheus · Selenium · REST API

PROJECTS

Home Media & Virtualization Lab (Proxmox & Docker)

— Architected a home server using Proxmox VE to host multiple virtual machines and Linux Containers (LXC).
— Deployed a Jellyfin media server within a Docker environment, configuring an 8TB Seagate drive for high-capacity storage.
— Successfully implemented multiple GPU Passthrough to a virtualized environment to enable hardware-accelerated transcoding and Output a Display via GPU.

Facial Recognition Attendance System (Python)

— Developed a Python-based biometric system using facial recognition libraries.
— Awarded 2nd Place at a National Level Science Exhibition.

Aero Pre-Build PC Sales (ASP.NET & SQL Server)

Designed and developed an e-commerce platform for PC components with a robust SQL Server backend.
